All new providers will have two months of Obesity Medicine training with Diana Pallin MD before seeing patients independently. We also offer access to Obesity Medicine educational materials and Obesity Medicine Board review courses.

New Start Medical is a privately-owned medical practice providing weight management programs to patients 18 years and older. We focus on cardio-metabolic health and manage weight-related comorbidities such as diabetes, dyslipidemia, hypertension, fatty liver disease, obstructive sleep apnea, metabolic syndrome and provide preventative medicine care. At New Start Medical we provide comprehensive medical weight management developed to meet the specific needs of every patient. Our program follows the Obesity Medicine Association guidelines and has been designed to provide safe and healthy weight loss in a medically supervised setting.

New Start Medical is seeking a dedicated nurse practitioner (NP) to provide excellent care to patients with obesity and overweight. Duties include obtaining a comprehensive medical history, performing physical exams, interpreting lab results, prescribing and managing medication, and reviewing EKGs and Body Composition analyses. The NP will also provide focused counseling related to weight management, including nutrition, behavior modification and physical activity.

Requirements:

Interest in and desire to learn about weight management, preventative care and obesity medicine

Graduated from an accredited school of nursing

Must have an active, unrestricted Pennsylvania RN license, an active Pennsylvania CRNP certificate and an active Pennsylvania Prescriptive Authority Approval

DEA with prescriptive authority required
